INNOVATION

We want to showcase and celebrate all of the cool ways that students are utilizing technology, science, and new ways of thinking.

INVolVEMENT:

Groups have the option to host an interactive activity or create an installation to display at the festival. They will be responsible for setting up, hosting, and tearing down their event at Spring Jam™.

Groups may apply for up to $250 funding for event supplies, all additional materials must be provided by the group.

ACTIVATION IDEAS:

- Solar projects
- Sustainability projects
- Drone racing
- Science experiments
- 3D printing
- Robotics display

This is just a list to get you started. If your group has another idea for a creative workshop or activity, we’d love to hear it and can work with you to bring that idea to life at the festival.
